

NEW PRODUCT

MT410/G

In 2004 GME revolutionised the EPIRB world with the introduction of the GME MT400, the first truly affordable 406MHz emergency beacon. Utilising the same ground breaking Australian technology, the MT410 and MT410G Personal Locator Beacons are the latest exciting extension to GME's growing family of innovative safety products.

Today with cutting edge microprocessor technology, GME's engineers are able to provide the outdoor adventurer with a 406MHz PLB solution that is not only affordable, but provides enhanced peace of mind for boaters, bush walkers, 4 x 4 enthusiasts and aviators should they ever require emergency assistance. GME has been designing and manufacturing emergency beacons in Australia for over 30 years. In that time literally hundreds of lives have been saved in Australia and around the world.

Features on the MT410 include:

- 7 year battery life / 7 year warranty – unique to GME
 - High intensity LED strobe – unique to GME
 - Non Hazardous batteries – unique to GME
- Extremely simple 2 step activation – unique to GME
- Instantaneous 406MHz transmission – unique to GME
- GPS version accuracy to <45m typical (5kms Non GPS version)
 - Less than 1 minute accusation time (GPS Version only)
 - IP67 – Floats
- Featherweight, compact and robust construction
 - Total Australian design and manufacture
